

Geospace Seismic Recorder (GSR)

Mobile System Manager (MSM)

Mobile System Manager, MSM, is a purpose-built and independently powered unit that serves as the nerve center for the management of the project in the field. The MSM centralizes all the systems needed to support seamless GSR System field deployment and data management. Every MSM is configured to meet the customer's field needs while containing all of the ancillary systems necessary to support seamless GSR field deployment, data management and field crew comfort.

Standardized 40 foot Intermodal Transport Container

Field Trailer

Ruggedized Portable Field Cases
